

PRESS RELEASE

Mitsubishi Electric to highlight IIoT solutions at Drives & Controls 2022

Duncan Nicol, Marketing Development Manager

At this year's Drives & Controls Exhibition, Mitsubishi Electric will showcase how advanced industrial automation solutions enable the creation of future-oriented Industrial Internet of Things (IIoT) applications. Outlining the advantages of these technologies, visitors to stand F100 will be invited to see how the company's portfolio can drive up productivity and enable data convergence.

The digital transformation of business is helping to realise smart manufacturing frameworks that can deliver accurate predictive insights to improve and optimise operations. Mitsubishi Electric will present how smart factories that can process, analyse and share data using next-generation automation devices can be created.

Industry leading developments in PLCs, HMIs and drives that leverage Time-Sensitive Networking (TSN) to support convergence will be available on the stand to show how their compatibility with CC-Link IE TSN enables these products to futureproof enterprises. CC-Link IE TSN is the first open gigabit industrial Ethernet that supports TSN connectivity. This is an innovative technology that can simultaneously facilitate convergence and determinism. Ultimately, it offers a unique gateway to merge the IT and OT domains to enable data-driven decision making while supporting high-speed, time-critical shop floor communications.

Visitors will also be able to learn about the company's comprehensive range of robots and integrated solutions. Among them will be ICONICS' suite of advanced visualisation technology. Also on stand will be the results of the collaboration with leading provider of operational technology (OT) cyber security solutions for industrial automation networks, Radiflow.

Duncan Nicol, Market Development Manager, comments: "We look forward to attending Drives & Controls 2022 and offering an insight into how companies can prepare for the future of manufacturing. In particular, how

they can succeed in their digital transformation by utilising TSN and our ever-growing range of automation components that support this technology. We invite visitors to discuss their applications and requirements with our experts on stand F100.”

Visit Mitsubishi Electric at Drives & Controls Exhibition 2022 on stand F100. 5-7, April 2022 – NEC, Birmingham.
