

Sustainable solutions for the water sector

30th September 2022

Sulzer brings technical expertise to WEFTEC 2022

Visitors to WEFTEC 2022 exhibition can meet with Sulzer to see next-generation, sustainable engineering solutions for the complete water cycle. Available on Booth 3439 in Halls A-J from October 10-12 at The Ernest N. Morial Convention Center in New Orleans, water experts will be ready to discuss efficiency improvements for water and wastewater applications.

WEFTEC gathers global water professionals to showcase the latest technological advancements. Sulzer provides complete solutions for the clean and wastewater cycles including intake, distribution, treatment and release back into the environment. Across applications, Sulzer offers operators the chance to reduce energy usage, increase uptime and improve water quality. Sulzer will be highlighting its reliable, highly efficient XFP submersible pumps for wastewater pumping stations. New expanded hydraulic options for this popular model will be announced by the global pump manufacturer at the event. Other submersible products displayed will include the RW and XRW mixers, which offer reduced power consumption for mixing and agitation. Joining these is the XRCP recirculation pump, which is ideal for efficient sludge pumping with a specialized design for large flows and low heads. Representing aeration applications, the HST™ turboblower will be present with its magnetic levitation bearing technology, backed by an accompanying video exploring its energy savings. Reliable and versatile vertical pumps from Sulzer brand Johnston Pump will also be available for viewing.

The Sulzer stand will also include products from the Nordic Water brand including innovative and energy efficient filtration solutions for removing particles from water, including its extensive range of screens, sand filters and fiber disc filters. Combined with its tertiary treatment systems, Nordic Water provides proven technologies for water purification. To demonstrate its ability to improve water quality, Sulzer will offer attendees the chance to explore a virtual reality water treatment facility showcasing Nordic Water products in relevant application environments.

Opposite the Sulzer stand will be JWC Environmental, another Sulzer brand. Delivering real solutions for real industry problems, JWC will highlight solids reduction, separation and removal systems on in Booth 3451.

WEFTEC 2022 exhibition takes place from October 10-12 at The Ernest N. Morial Convention Center in New Orleans, Louisiana, USA. Visitors can meet with Sulzer on Booth 3439 in Halls A-J. First paragraph in bold

About Sulzer

Sulzer is a global leader in fluid engineering. We specialize in pumping, agitation, mixing, separation and purification technologies for fluids of all types. Our customers benefit from our commitment to innovation, performance and quality and from our responsive network of 180 world-class production facilities and service centers across the globe. Sulzer has been headquartered in Winterthur, Switzerland, since 1834. In 2021, our 13'800 employees delivered revenues of CHF 3.2 billion. Our shares are traded on the SIX Swiss Exchange (SIX: SUN).
