

medmix at FEICA 2022

12 September 2022

Effective packaging & application innovations for your adhesives

Less waste and reduced transportation costs are just two major benefits of the latest innovations from medmix, formerly Sulzer Mixpac. These innovations not only reduce CO2 emissions but are more cost-effective, delivering sustainability with a competitive advantage. Meet us at FEICA 2022 and get to know more about how you can benefit from the sustainable GreenLine 50ml cartridge and the ecopaCC collapsible cartridge.

The right mixture at the right time for every application. That is the core competency of medmix. Its latest innovations are two low carbon cartridge systems. The 50ml MIXPAC™ GreenLine is the first cartridge manufactured from 100% post - consumer recycled polypropylene (PCR PP), while the MIXPAC™ ecopaCC collapsible cartridge offers a 75% reduction in CO2 emissions compared to a traditional 600ml 1:1 solid cartridge made of PP. Furthermore, these products, especially the ecopaCC system, have a positive value impact with regards to logistics and waste reduction.

Compatible systems

Reliability, quality and precision defines the medmix product range and service offering. Cartridges provide strong barrier properties to meet the needs of multiple materials and the robustness to withstand mechanical forces of application. Dispensers offer ease of use and compatibility across the range of different cartridges, ensuring accurate and straightforward application of adhesives and

sealants. As a result, the user of two component (2K) materials can be assured that all parts fit perfectly together, providing a high level of safety, efficiency and effectiveness in applications.

Meet us at FEICA 2022

Besides the 50 ml GreenLine and ecopaCC, our experts will showcase the latest innovations at the medmix tabletop booth. They will be available to discuss in detail products suitable for your adhesive opportunities. To contact us in advance, just send an e-mail to sales.industry@medmix.com or call us on +41 81 414 71 60. For the latest news, follow us on LinkedIn.

About medmix

medmix is a global leader in high-precision delivery devices. We occupy leading positions in the healthcare, consumer, and industrial end-markets. Our customers benefit from a dedication to innovation and technological advancement that has resulted in over 900 active patents. Our 13 production sites worldwide together with our highly motivated and experienced team of 1,900 employees provide our customers with uncompromising quality, proximity, and agility. medmix is headquartered in Zug, Switzerland.

Our shares are traded on the SIX Swiss Exchange (SIX: MEDX).
www.medmix.swiss

medmix Industry delivers the world's leading hand-held mixing and dispensing systems for adhesives and sealants. Through MIXPAC™, COX™ and MK™ we specialize in the mixing and hand-held dispensing of adhesives and sealants. We have strong partnerships with industrial manufacturing, production, coating, and construction leaders that have lasted for close to 100 years.
