

medmix upgrades its F-System with the 100% recycled greenLine™ bayonet ring

28 April 2022

With the MIXPAC™ F-System, medmix provides a complete and compatible solution that meets the demanding needs for multifunctional industrial applications. Determined in pursuing its sustainability objectives, medmix upgrades the proven system with a bayonet ring based on 100% post-consumer recycled (PCR) polypropylene.

The innovative bayonet ring combines exceptional performance with the "eco-advantages" of its 100% recycled material design. It provides medmix customers the support they need to achieve their sustainable business goals. The sustainable bayonet ring helps customers to reduce their carbon footprint and to position themselves better to win new business with ecologically-minded customers.

Developed with a robust and durable design, the greenLine bayonet provides a secure, leak-free connection between the mixer and cartridge. Due to the multifunctional concept of the complete F-System, this upgrade is fully compatible with manual, pneumatic and battery dispensers as well as the extensive range of Helix and QUADRO™ mixers. The bayonet ring safeguards high precision dispensing for homogeneous mixing and exact metering. Covering a broad range of industrial applications, the smart innovation guarantees the excellent performance and Swiss quality that is inseparably associated with MIXPAC.
