

## **medmix strengthens support for US market with latest facility expansion in New Hampshire**

**07 April 2022**

*medmix, a leading provider of high-precision liquid application and mixing technologies, has announced it is expanding with a new supply facility in Salem, New Hampshire. The site is part of medmix's wider local for local strategy in the USA, designed to reduce lead times and increase the service level for customers in the industry and dental sectors.*

Joe Bradley, Head of Site Operations at medmix Salem, NH facility, says: "We are expanding our facility, to ensure that we can continue to offer our customers a highly responsive and localized service for Industry and Dental products in the USA. This will centralize and consolidate our logistics operations, further improving response times and resilience across our services."

The Salem, New Hampshire facility offers an additional 45,000 sq. ft of space to medmix and will primarily act as a distribution center, holding stock of industry and dental products ready for rapid dispatch. This medmix facility will allow the business to prioritize service even more, shipping stock products with rapid turn-around times.

Joe adds: "The new facility will provide us increased flexibility and control over the services we offer to our customers in the industry and dental markets. This extends beyond the mechanics of delivering high-quality dispensing systems, cartridges, mixing tips, dispensers, and a variety of dispensing needles. Our new offerings for customers will include custom packaged items, reducing lead-times and expanding

*our service offering. Bringing the supply chain close to our US customers, will allow us to further increase our service level. Giving customers faster access to our leading brands, MIXPACTM (Industry and Dental), COXTM and MKTM and transcotentTM.”*

As a part of medmix sustainability strategy, initiatives have been put in place to reduce the facility's environmental footprint. The roof is covered by a huge array of solar panels, which will provide green energy. During the expansion project, medmix has used reclaimed materials wherever possible throughout the building. Furthermore, the new parking areas are constructed with recycled aggregate.

To support the growing business, and the expanded facility, medmix is also hiring. There are new opportunities to join its purchasing, planning, warehousing and distribution teams. To apply, visit [medmix.swiss](https://medmix.swiss)
