

## **New AEMT Ex Training course dates for**

**2020**

**10 March 2020**

**Dates for this years Ex Training courses have been released by the AEMT. The course focuses on training electrical and mechanical technicians who service and repair motors, gearboxes, pumps and ancillary equipment from hazardous zoned areas. They are designed to ensure compliant and certified repairs are carried out. Further topics covered as part of the course include legal requirements, risk assessments along with health and safety considerations.**

Courses are not just relevant to newcomers. Individuals must take a refresher course every three years to ensure companies remain compliant. The training course forms the basis of British and European BS EN 60079-19 and International IEC60079-19 standard for the repair, overhaul and reclamation of hazardous area equipment.

Ex Training courses take place in England, Scotland, Bahrain, Dubai, Indonesia, Malaysia, Singapore and Thailand throughout 2020. A number of the training locations are yet to be confirmed, so attendees are encouraged to check the AEMT Ex Training calendar. for the latest details.

## **About the AEMT**

The Association of Electrical and Mechanical Trades (AEMT) was founded in 1945. It is an International Association representing leading companies in the electrical and mechanical service and repair industry. Members manufacture, distribute, install, service, maintain, and repair, electric motors, drives, pumps, fans, gearboxes, generators, transformers, switchgear, and ancillary equipment. In addition to motor and pump service facilities, most members operate mechanical engineering workshops for metal fabrication and the repair and refurbishment of worn components. Others include panel building facilities and some carry out repairs to industrial electronic equipment. Associate Members are companies that supply products and services to Members.

Proceeding the publication of AEMT's and BEAMA's jointly produced first code of practice for The Repair and Overhaul of Electrical Equipment for use in Potentially Explosive Atmospheres, which was adopted as the initial IEC 60079-19 international standard. The association has put together a selection of Training modules covering the Theory and Practical nature to ATEX and IECEx equipment repair. The modules are delivered as accredited training courses by expert teams across the globe.
