

## **Emissco's latest exports to the Middle East cement growing global footprint**

**4th November 2021**

**Emissco, a leading manufacturer of fluids and aerosols, has reinforced its global supply capabilities by exporting over 150,000 units of automotive aerosols and food grade products into the Middle East. Emissco offers customers turnkey, high value contract manufacturing and distribution services designed to introduce new fluids and aerosols to any market.**

“This export contract to the Middle East is the latest example of our global reach, as well as our large fluid and aerosol production capacity,” says Neil Harrison, Sales Director at Emissco.

“We are a trusted fluid and aerosol manufacturer and filler, with partners including Yara, the world's largest manufacturer of AdBlue for modern diesel vehicles. Our turnkey approach means that we can offer tailored services designed to meet the needs of markets around the world.”

Based at a purpose-built facility in Cheadle, Staffordshire, Emissco is a fluid and aerosol solutions provider. Able to develop, formulate, manufacture, package, label and distribute products – the business offers a complete approach for each service individually. This ensures that whether a customer requires an entirely new formulation, or existing stock manufactured and packaged, Emissco has the flexibility to meet all requirements. Automated, custom-built production lines provide

high manufacturing capacity, suitable for delivering the quantities required to support global commercial distribution.

“Thanks to our extensive in-house expertise, we are able to deliver a wide range of projects including mass production orders backed by an exceptionally robust supply chain. Delivering large quantities of AdBlue to garages and retailers nationwide illustrates our capabilities. The resilience we offer also means that we can reliably supply products worldwide, as evidenced by this latest export to Dubai,” Neil explains.

As well as offering a multi-faceted service for delivering new fluids and aerosols to market, Emissco has a complete range of ready-made formulations designed for easy rebranding. These include ranges created for automotive maintenance, valeting, rail and industrial applications. This offers customers a fast, cost-effective method to launch new products or grow an existing range.
