

Klarius Focuses on delivering new exhausts to market

24 February 2022

Klarius has added 33 new products to its emissions control range, including catalytic converters (CATs) and diesel particulate filters (DPFs) for multiple models of the Ford Focus. All components in the Klarius range are available with a Fit First Time guarantee, a 2-year warranty and next morning delivery to stockists and distributors.

Plenty of new CATs have been added to the Klarius range. Supported vehicles include the trusty 2008-2015 Honda Jazz 1.2 and 1.3, the 2010 onwards Fiat 500 and 500L 0.9, the Ford Kuga 2.0 from 2013 forwards, the 2010 onwards Kia Sportage 1.6, the second-hand bargain 2005-2009 Saab 9-3 1.9 as well as the striking Citroën C4 Cactus 1.2. There are also new CATs available to fit a wide selection of German hatchbacks, French vans and Japanese vehicles.

Shifting to DPFs, new items are in stock for the stylish 2011-2015 Jaguar XF 2.2, the 2006-2014 Land Rover Freelander 2.2, the Volkswagen Crafter 2.5D for 2009 models onwards and for popular Ford and German cars. Finally, new exhaust systems are available for Dacia, Nissan and Citroën vehicles.

Klarius Products has the largest range of aftermarket exhausts available nationwide. Totalling over 11,000 parts, the range has solutions ready to fit 24 million vehicles

on UK roads. Products are in range to fit almost any make, model and age. The range is constantly growing too. In 2022 alone, Klarius has already released 63 new products to market.

Quality is built into every Klarius exhaust. Bespoke mountings are available with each system for a secure fit. Rigorous product development and testing is carried out on vehicles of correct make, model and production year. As a result, every Klarius component will match or exceed the performance of the original part. To reinforce this, every applicable component is independently type-approved with the Vehicle Certification Agency (VCA) in the UK and the TÜV in Germany.

Klarius offers a market-leading rapid delivery service to customers via its in-house logistics operation, AutoLogistiks. Availability is secured across the range thanks to large warehouse capacity, dynamic stocking procedures and demand driven manufacturing - ensuring that both popular and niche components offer the same next morning lead time to distributors and stockists.
