

One-stop shop for compressor services

03 January 2023

As of January 2023, Arkos Field Services, acquired by Burckhardt Compression in 2019, is integrated with Burckhardt Compression (US) Inc. Customers benefit from combined knowledge, expertise and unrivalled solutions for reciprocating compressors and other equipment from one provider. The integration of the two brands streamlines business processes to provide easy access and a solutions-driven customer experience.

With 10 service centers across the USA and a dedicated workforce Burckhardt Compression US is qualified and equipped to deliver a comprehensive range of services to customers. From emergency call-outs to parts manufacturing and planned maintenance, the company offers the best from both sides of the integration process from one platform. The fast response to get equipment back up and running as well as the knowledge and expertise to keep all makes and models of reciprocating compressors in perfect working condition.

At Burckhardt Compression, the mission is to establish working partnerships that promote trust, communication and a paramount commitment to safety, health, and excellent stewardship of the environment.

Safety ethos

Working in gas gathering and processing means safety is of paramount importance and Burckhardt Compression sets the benchmark by ensuring that all staff and

operators are properly trained and certified for working in such a challenging environment.

As an OEM with over 175 years' experience in engineering excellence, the company offers unrivalled knowledge and expertise in compressor operation and maintenance. Central to the continued success of the company is a program of continuous training for both staff and customers. Only by improving the knowledge of people working with compressors can they be expected to deliver more reliable and efficient service.

Burckhardt Compression believes in delivering the optimal solutions for every individual situation. Listening and understanding the needs of customers is essential to establishing the best course of action. The exceptional knowledge base within the company ensures that the most effective and efficient solutions are offered, by taking account of all the stakeholders' considerations.

Driving sustainability

Reciprocating compressors face many challenges operating in a difficult environment where reliability is crucial. Maintaining optimum performance requires expert support that offers operators long-term solutions as well as rapid responses to any emerging challenges.

In today's market, customers expect suppliers to have very high standards and sustainability is of great importance. Burckhardt Compression enables customers to optimize their efficiency and extend the service life of their equipment. By minimizing energy consumption and reducing emissions, operators can benefit from reduced operating costs as well as reducing their impact on the environment.

The partnership between operator and maintenance provider is crucial to the long-term, reliable service of any gas compressor. As new markets, such as hydrogen fuel, emerge from their infancy, Burckhardt Compression will lead the field in driving sustainable solutions and outstanding customer support.
