

Anti vibration mount installation kits speed up specification and installation

25 April 2023

WDS Components is now providing anti vibration mounts as a complete kit to enable fast and simple procurement and installation. Acting as a vibration dampener or shock absorber, anti vibration mounts are now available with studs, washers, and bolts, comprising all the components required to enable installation. The anti vibration mounts reduce noise and vibration on applications such as machines, engines and motors, compressors and control panels.

The industrial standard mounts can be used across heavy-duty factory equipment, through to commercial applications and the marine sector. Providing the mounts as a complete kit speeds up parts specification and enhances ease of installation. With male and female threaded mounts, the new installation kit format comprises bolts in diameters from M3 to M12, as well as various shaft lengths to suit a variety of applications.

Ideal for machines with low to medium vibration levels, WDS now provides a flanged bolt down anti vibration mount with a fitting kit (part code WDS 718). Suitable for outdoor as well as indoor use, these anti-vibration mounts can be used with loads from 3.5kg up to 50kg. The mounts feature a Shore hardness rating from 40 up to 60, making them suitable for vibration reduction across various machine types and running

speeds. In widths of 63mm to 112mm, the kit height including the mounting bolt expands from 110mm to 120mm. The mount is manufactured with mild steel and the anti vibration component is made from black natural rubber.

For heavy vibration on rotating machinery up to maximum loads of 840kg, the machine shear kit anti vibration mount (part code WDS 719) is now also available with a fitting kit. As rubber mounts can perish over time, especially under heavy weights or arduous environmental conditions, the mount can shear away, creating a safety challenge. To combat this potential, a shear cap secured with a washer creates a built-in failsafe protection. Suitable for outdoor use, the mild steel mount is zinc plated to enhance resistance to corrosion, while the black rubber anti vibration component is available in a Shore hardness ranging between 40 and 60. Mount dimensions range from 88 to 156mm long and 145mm to 240mm high.

WDS now also supplies anti vibration turret mounts, intended for use beneath mechanical devices, with a mounting kit (part code WDS 721). In Shore hardness ranging from 40 to 75, turret mount heights vary between 120.5mm to 152mm, with widths ranging from 81mm to 143mm. Primarily for indoor use, the mounts comprise mild steel construction with a black rubber anti vibration device.

Full details of WDS' range of anti vibration mounts and mounting kits are available on wdscomponents.com This includes dimensions and product data to enable fast specification as well as free to download CAD images in a range to formats to enhance ease of design integration.

Anti vibration mounts and kits can be procured directly from the WDS website with same day shipping available in single units through to high volumes across much of the range. The WDS Stock Guarantee programme also applies across various mounts and kits within the range, providing 10% discount on any quantity ordered that cannot be fulfilled from existing stock.

About WDS Components Ltd

WDS Components is the home of standard parts and machine accessories. Established in 1952 'Woodside Die Sinking Company' made jig and die parts to speed up production in tool rooms, WDS Components has grown from humble beginnings to become a leading European manufacturer and global distributor of high quality durable parts at competitive prices. We supply components, standard parts and machine accessories to original equipment manufacturers, maintenance engineers, small businesses and individuals all over the world. Over 98% of our range is available from stock and can be shipped the same day from our global distribution centre in the UK, using best in class worldwide logistics companies.

We provide unrivalled choice and unequalled availability.

WDS Components are proud to support some of the most prestigious engineering companies and brands in the world, who all trust WDS Components to service their needs.

We are committed to engineering excellence and continuous improvement. Our team of in-house engineers has expertise spanning several decades and is a blend of highly experienced and new generation graduate engineers who focus on the latest developments in design and manufacturing technology.

Our entire range of products is available to purchase on our website [WDS COMPONENTS.COM](https://www.wds-components.com) where designers and manufacturers alike can download 3D models of all components in the widest range of formats available.

WDS Components provide solutions for customers who require a wide and growing range of high quality, competitively priced products, coupled

with incredible product availability and same day despatch, backed up by easily accessible technical support.
