

## **Driving sustainability in the water sector**

**19 September 2023**

### **Sulzer offers exclusive preview of new products at WEFTEC 2023**

**This year's WEFTEC technical exhibition and conference will see Sulzer presenting several exciting innovations in pumping, equipment control, filtration and aeration technology for the water and wastewater sectors. Exhibiting at booth 3625 in the South Hall of McCormick Place in Chicago, IL., Sulzer's water experts will be available from October 2-4 to discuss new advancements in energy efficiency, reliability and sustainability.**

The WEFTEC conference draws professionals from around the world, showcasing the latest developments for clean and wastewater applications. Sulzer has a comprehensive range of products that can improve process performance, reliability and efficiency, cutting energy usage and driving sustainability.

At the event, Sulzer will highlight its exceptionally efficient XFP submersible pumps for wastewater pumping stations, as well as exclusively previewing new technologies specifically for the industry. Build America, Buy American (BABA) requirements are expected to be a prominent talking-point at the conference. Here Sulzer will showcase its broad range of BABA compliant solutions, demonstrating its commitment to the US market.

Presenting its innovations for aeration applications, Sulzer will have a live demonstration of the magnetic bearings used in the HST™ turbo blower. These offer excellent durability and efficiency, reducing running costs and minimizing downtime for operators.

Visitors will also have the opportunity to see the reliable and versatile vertical pumps from Johnston Pump, a Sulzer brand, and appreciate the benefits these assets bring to water transport applications.

While on the Sulzer booth, take the chance to talk with filtration and screening experts from Nordic Water, a Sulzer brand. The brand will be showcasing the new SuperCloth disc filter, which delivers exceptional performance in floc removal and the reduction of phosphorous content in water. The company's wide range of innovative and energy efficient filtration solutions for removing particles from water include perforated screens, sand filters and fiber disc filters. Combined with its tertiary treatment systems, Nordic Water provides proven technologies for water purification.

Opposite the Sulzer stand will be JWC Environmental, another Sulzer brand, which will be exhibiting several products from its range of grinders, drum filters and other headworks assets. Delivering real solutions for real industry problems, JWC will highlight solids reduction, separation and removal systems on Booth 3631.

**WEFTEC 2023 exhibition takes place from October 2-4 at McCormick Place, Chicago, Illinois, USA. Visitors can meet with experts from Sulzer, and Sulzer brands Johnston Pump, Nordic Water and JWC Environmental in the South Hall, Booths 3625 and 3631.**

**About Sulzer**

Sulzer is a global leader in fluid engineering and chemical processing applications. We specialize in energy-efficient pumping, agitation, mixing, separation, purification, crystallization and polymerization technologies for fluids of all types. Our solutions enable carbon emission reductions, development of polymers from biological sources, recycling of plastic waste and textiles, and efficient power storage. Our customers benefit from our commitment to innovation, performance and quality through our responsive network of 180 world-class manufacturing facilities and service centers across the globe.

Sulzer has been headquartered in Winterthur, Switzerland, since 1834. In 2022, our 12'900 employees delivered revenues of CHF 3.2 billion. Our shares are traded on the SIX Swiss Exchange (SIX: SUN).
