

# Detent pin range grows to the largest available in the UK

12 March 2024

**WDS Components has extended its range of detent pins, adding over 400 new models that cover a vast range of styles, materials, and sizes. The Leeds manufacturer and supplier of standard parts and components offers the largest range of detent pins available in the UK and can also provide same-day shipping for high-volume orders. As well as economical designs, WDS also provides stainless steel detent pins, and now, hardened steel models as well.**

Detent pins are a quick and easy way to locate and secure an application in place. The quick release ball locking pin uses two spring-loaded ball bearings to prevent the pin from working free from the application. Ideal when a quick connection fastener is required, detent pins offer greater convenience than a nut and bolt and provide a reliable and accurate connection.

## **Tough materials**

The fasteners can be used as a safety shut-off mechanism for machinery, and they're commonly used in applications such as gantries to configure and secure the layout of beams. As a quick and simple way of connecting industrial plates, detent pins can also couple light-duty towing equipment, or can be used to secure doors or hatches.

Available in 316 stainless steel, WDS detent pins are suitable for long-term use in corrosive environments. This includes food & beverage preparation areas that are

subject to aggressive chemical washdowns, as well as marine environments, and outdoor use including agricultural applications.

Now, a heavy duty hardened stainless steel 17-4 PH detent pin range is also available from WDS. As strong as using a traditional fastener, these designs include the torsional resistance properties of steel, with a corrosion-protected surface that also adds resilience to marking or denting.

WDS also provides zinc-plated steel detent pins, providing strength with an anti-corrosion coating at an economical price point.

### **Designs for all applications**

Numerous styles of detent pin are available, ranging from a simple shank, through to handled versions featuring grips such as T handles and ball knobs. Handles are also available in different materials, from nylon through to stainless steel, as well as various colours, including polished metallic finishes. Designs can also include a keyring, enabling attachment of a label or lanyard.

An array of sizes is available, ranging from 5 mm diameter up to 12 mm, and a variety of detent pin lengths extend up to 120 mm, making them suitable for equipment such as gym machinery for the retention of weights.

Many detent pins in the range are available in the WDS Components Stock Guarantee offer. This means that for any individual order volume that WDS cannot fulfil, up to a guaranteed amount, the company will apply 10% price discount for the remainder of the order. Same day shipping, to anywhere in the world, is also available.

Full details are provided on [wdscomponents.com](https://www.wdscomponents.com), including a comprehensive specification. Information also includes-free-to-download CAD files, available in a variety of formats, as well as non-specialist images.

## About WDS Components Ltd

WDS Components is the home of standard parts and machine accessories. Established in 1952 'Woodside Die Sinking Company' made jig and die parts to speed up production in tool rooms, WDS Components has grown from humble beginnings to become a leading European manufacturer and global distributor of high quality durable parts at competitive prices. We supply components, standard parts and machine accessories to original equipment manufacturers, maintenance engineers, small businesses and individuals all over the world. Over 98% of our range is available from stock and can be shipped the same day from our global distribution centre in the UK, using best in class worldwide logistics companies.

We provide unrivalled choice and unequalled availability.

WDS Components are proud to support some of the most prestigious engineering companies and brands in the world, who all trust WDS Components to service their needs.

We are committed to engineering excellence and continuous improvement. Our team of in-house engineers has expertise spanning several decades and is a blend of highly experienced and new generation graduate engineers who focus on the latest developments in design and manufacturing technology.

Our entire range of products is available to purchase on our website [WDS COMPONENTS.COM](https://www.wds-components.com) where designers and manufacturers alike can download 3D models of all components in the widest range of formats available.

WDS Components provide solutions for customers who require a wide and growing range of high quality, competitively priced products, coupled with incredible product availability and same day despatch, backed up by easily accessible technical support.
