

Meet Burckhardt Compression's best in the field

21 March 2024

All great adventures start out on the road, and that's certainly the case for Burckhardt Compression's field services teams. The company has released a new YouTube video, [Real Work for Real People](#), where we get to meet its dedicated compressor field service technicians and experience the challenges they face every day out in the field.

[Watch Real Work for Real People here](#)

Compression solutions are common in gas gathering and processing as well as energy and construction applications. These critical industries require compressors to operate with the utmost reliability so that essential services can be maintained. Burckhardt Compression's field service technicians are ready 24/7 to quickly respond to any breakdowns, figure out problems, conduct detailed inspections or complete overhauls for compressors from any brand. This is no easy task, as they will never face the same job twice.

In the video, we meet Burckhardt Compression field service technicians in North America as they visit sites throughout the state, conducting around-the-clock compressor maintenance for customers. Excelling in this environment relies on the teams getting their hands dirty to safely solve complex engineering problems and get units back online as fast as possible.

To achieve this, they rely on innate technical skills, strong customer relationships and company-wide support. It's not just the man on the ground - the synergies between technicians on-site, account management, logistics and Burckhardt Compression's worldwide network, all contributes to a flawless execution. The common theme is [passionate people](#) with a dedication to customers.

Whether early in the morning or late at night, the team goes above and beyond to provide the best possible solution. Burckhardt Compression field service technicians show why the company has been the market-leader in compressor craftsmanship since 1844, and *Real Work for Real People* gives a brief glimpse into what's required to become a master of the art.
