

Portescap a Featured Exhibitor and Speaker at Robotics Summit & Expo 2024

25 March 2024

Portescap, a global leader in micro motion solutions for the robotics industry, is excited to announce that it will be exhibiting at the Robotics Summit & Expo from May 1-2, 2024, at the Boston Convention and Exhibition Center in Boston, Massachusetts.

Please join us at Booth #144 where the Portescap team will showcase solutions for demanding robotics applications, including frameless motors and flat motors which can easily integrate with strain wave gearing. Frameless motors bypass the use of a traditional housing with integrated bearings for direct integration into mechanical assemblies, enabling compactness, weight savings, and efficiency gains. Pairing flat motors with strain wave gearing offers high reduction ratios, low backlash, and superior positional accuracy, offering exceptional torque and precise motion control for critical robotic applications.

Fellow Regal Rexnord brand, Kollmorgen, will be exhibiting adjacent to Portescap at Booth #142.

Portescap and Kollmorgen will together present the topic: **Design for Peak Performance: Motion Control System Selection in Next-Gen Robotics**, on Wednesday, May 1st at 1:45pm. Please join our speakers Greg Harnsberger, Senior Manager, Global Industry Marketing at Portescap, and Yoshi Umeno, Industry

Manager at Kollmorgen, for this educational session on designing for peak performance.

About Portescap

Portescap offers the broadest miniature and specialty motor products in the industry, encompassing coreless brush DC, brushless DC, stepper can stack, gearheads, digital linear actuators, and disc magnet technologies. Portescap products have been serving diverse motion control needs in wide spectrum of medical and industrial applications, lifescience, instrumentation, automation, aerospace and commercial applications, for more than 70 years.
