

## **Sulzer introduces rental test equipment for agile and cost-effective process development**

11 April 2024

**To streamline process development initiatives and empower the green transition in industrial manufacturing, Sulzer introduces a comprehensive range of rental test equipment to support the development of bio-based products.**

Sulzer's rental equipment makes process development agile and cost-effective by minimizing investment, start-up, and maintenance costs. The selection caters not only to traditional wood and pulp-based intermediates but also novel feedstocks such as mixed and virgin textiles, agri-waste, and biomass from various sources.

Testing can be conducted at Sulzer's full-scale development center in Kotka or at the customer's site, providing flexibility in testing environments. Additionally, Sulzer offers the possibility of co-development projects if specific equipment needs are not met by the existing rental selection.

With a long history in research and development in a network of leading forest industry companies, academics and research institutes, Sulzer stands as a committed partner for process development. The company ensures scalable solutions for partners' development initiatives with unmatched application expertise and a versatile portfolio of process equipment.

With a legacy of innovation and strong experience as an equipment supplier, Sulzer continues to drive advancements in various industries, offering cutting-edge solutions for the evolving needs of its partners worldwide.

**About Sulzer**

Sulzer is a global leader in fluid engineering and chemical processing applications. We specialize in energy-efficient pumping, agitation, mixing, separation, purification, crystallization and polymerization technologies for fluids of all types. Our solutions enable carbon emission reductions, development of polymers from biological sources, recycling of plastic waste and textiles, and efficient power storage. Our customers benefit from our commitment to innovation, performance and quality through our responsive network of 180 world-class manufacturing facilities and service centers across the globe.

Sulzer has been headquartered in Winterthur, Switzerland, since 1834. In 2022, our 12'900 employees delivered revenues of CHF 3.2 billion. Our shares are traded on the SIX Swiss Exchange (SIX: SUN).
