

## **ECS Engineering Services secures its spot among East Midlands' elite 200**

**18 April 2024**

**ECS Engineering Services has achieved a remarkable milestone, securing its place among the top 200 fastest growing companies across the East Midlands for 2024. This inclusion not only showcases ECS's substantial growth and business excellence but also places it prominently at number 60 in this prestigious list.**

The East Midlands 200 report, produced by Grant Thornton, is an authoritative survey of the fastest-growing companies in the region, highlighting their financial performance and industry leadership.

The report for 2024 reveals a dynamic business landscape in the East Midlands, with ECS Engineering Services standing out due to its innovative strategies and commitment to excellence. With a focus on delivering high-quality engineering solutions, ECS has demonstrated the kind of drive and leadership that propels companies to the top of their industries.

Mark Watkins, Managing Director at ECS commented, "Being listed in the East Midlands 200 is not just an honour but a recognition of ECS's contribution to the regional economy and its pivotal role as a flag bearer for the East Midlands' business community. This acknowledgment from Grant Thornton serves as a benchmark for success and firmly positions ECS Engineering Services as a leader amongst its peers."

This milestone is a moment of pride for all associated with ECS, offering a platform to build on for future growth. It reflects the company's dedication to its clients, employees, and the broader community, marking ECS as a forward-thinking company poised for continued success in the years to come.

## About ECS Engineering Services

ECS Engineering Services has over 30 years experience in delivering high quality, reliable and cost effective engineering solutions, specialising in bespoke design and construction of water, energy and environmental processing and management projects.

In conjunction with key supply partners, ECS has the expertise and capacity to design and install a wide range of water control engineering projects. With in-house fabrication services, which have CE Marking approval to EXC4, well equipped and highly skilled engineers can also complete structural steelwork, bespoke fabrication work and access metalwork to the highest standard.

With a complete range of site services available, ECS offers a full turnkey project managed service for mechanical and electrical installations including managing civils contractors and supplying pipework, control and automation work to ensure that every installation is installed and commissioned to the highest standard. Existing clients include the majority of the UK Water Utility companies, Government Agencies and Internal Drainage Boards.
