

Klarius Expands its Offerings with New Parts for the Iconic Mini Cooper

30 April 2024

Klarius Products has once again broadened its catalogue of aftermarket emissions components, this time adding 44 new parts to its collection. Among the highlights is an exhaust system designed for a true British icon – the Mini Cooper.

[View the full parts list here.](#)

Since its debut in the late 1950s, the Mini Cooper has embodied the pinnacle of style, performance, and cultural impact. While the original Mini was conceived as an answer to fuel shortages in the wake of the Suez Crisis, the Cooper's zippy performance made it a star on the road and the rally stage alike, capturing hearts with its unique blend of practicality and charm.

More than just a car, the Mini Cooper became a cultural phenomenon. It starred in films, won gruelling races, and was beloved by celebrities and the public alike. Its design, constantly evolving while staying true to its original spirit, has allowed the Mini to remain a cherished fixture on roads around the world. It stands as a testament to the power of combining form with function, and heritage with innovation.

Today, the redesigned, BMW-manufactured Mini Cooper continues to thrill drivers with its spirited performance and classic good looks, and Klarius is ready to support

this enduring legacy with a fresh influx of high-quality emission components. Whether you're cruising city streets or tackling country roads, Klarius ensures your Mini stays running clean and smooth.

Fast facts:

- **Rally champion:** The Mini Cooper gained fame for its surprising success in the Monte Carlo Rally throughout the 1960s, winning in 1964, 1965, and 1967. It also won in 1966 but was disqualified on a technicality!
- **First-class pedigree:** John Cooper, who helped to create – and lent his name to – the Mini Cooper built Formula One cars for the legendary driver Stirling Moss throughout the late 50s.
- **Silver screen sensation:** An astonishing 32 Mini Coopers were used during the production of the 2003 remake of *The Italian Job*. Three of these were converted to run on electric power, as officials were concerned about exhaust fumes during scenes set in the tunnels of the Los Angeles Metro.

With Klarius's commitment to quality and service, Mini Cooper owners can rest assured their vehicles are equipped with the finest aftermarket emissions parts available. With an extensive catalogue of over 11,000 parts and next-day delivery on orders placed before 5:30 PM, Klarius is dedicated to keeping your Mini Cooper on the road and running at its best.
