

Regal Rexnord docks at TOC Europe 2024 with full system solutions for port cranes

04 June 2024

Leading brands from Regal Rexnord Powertrain Solutions will be present at TOC Europe 2024, displaying a complementary range of interoperable system solutions for port and dock cranes. Taking place from 11-13 June at the Rotterdam Ahoy Centre in the Netherlands, visitors can meet with experts from Svendborg Brakes, Jaure, Bauer Gear Motor, Stearns, and Stromag on Stand C42 during the event.

TOC Europe gathers the world's leading port decision makers, policy experts, and solution providers to network and discuss new innovations. Regal Rexnord will contribute by showcasing an extensive range of disc, drum, emergency, motor, and wheel brakes; barrel and disc couplings; rail clamps and presses; hydraulic power units (HPUs), automatic hydraulic lowering systems, geared cam limit switches, Industrial Internet of Things (IIoT) capable monitoring solutions, hydraulic buffers, and U-joints. By partnering with Regal Rexnord, port operators and crane original equipment manufacturers (OEMs) have access to full system solutions from a single trusted source.

Port cranes are essential for the loading and unloading of heavy cargo and containers, so uptime and efficiency are critical to operators and OEMs. Specifying fully interoperable power transmission equipment can deliver improved system reliability, performance, and service life. Furthermore, working with a single supplier

streamlines maintenance and procurement. At all points of the crane lifecycle, Regal Rexnord can add value to operations.

All brands have proven track records providing standardized and customized heavy duty solutions to power, control, and transmit motion in extreme environments across the most demanding industries. In terms of cranes, Regal Rexnord has exceptional experience in nuclear, metals, construction and mining applications. The superior engineering expertise, product interoperability, manufacturing capacity, and application understanding of Regal Rexnord delivers unrivalled performance and safety for port cranes.

On stand, visitors will be able to view a dynamic test bench featuring a brake, HPU, and the Perceptiv™ monitoring solution, which together will simulate and visualize brake performance during the lowering of a load. This active demonstration of interoperable products will be supplemented by the input of port crane experts from each brand, all ready to discuss specific customer application challenges. Additionally, attendees can learn more about Perceptiv, a comprehensive condition monitoring and preventative maintenance solution designed to improve overall equipment effectiveness (OEE). As well as the stand in Hall 1, Regal Rexnord will display an impressive array of products in Hall 2, so visitors can get a first-hand look at its innovative solutions.

Access to the products, services, and expertise of Regal Rexnord brands is available via one point of contact. A global footprint with localized facilities ensures customers work directly with a familiar and likeminded account manager or engineer throughout projects. Additionally, this extensive coverage ensures rapid response maintenance support for portside facilities in Europe, the USA, and Asia - effectively reducing crane downtime.

All Regal Rexnord systems are proudly painted orange, symbolizing a strong commitment to visibility, safety, and innovation. Just like the bold color, solutions from the company stand out for their reliability and performance. For engineering excellence, look for orange.

Join Regal Rexnord port crane experts on Stand C42 at TOC Europe 2024 from 11-13 June at the Rotterdam Ahoy Centre, Rotterdam, the Netherlands.

About Regal Rexnord

Regal Rexnord Corporation is a global leader in the engineering and manufacturing of automation sub-systems, industrial powertrain solutions, automation and power transmission components, electric motors and electronic controls, air moving products, and specialty electrical components and systems, serving customers around the world. Through longstanding technology leadership and an intentional focus on producing more energy-efficient products and systems, Regal Rexnord helps create a better tomorrow – for its customers and for the planet.

Following the acquisition of Altra, and commencing with its 1Q 2023 earnings release, Regal Rexnord will report under four operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, Automation & Motion Control and Industrial Systems. Regal Rexnord is headquartered in Beloit, Wisconsin and has manufacturing, sales, and service facilities worldwide.
