

## **Klarius goes ‘Business Class’ with new parts for a Mercedes favourite**

**30 July 2024**

**The summer holiday period is not slowing Klarius down as it adds 33 new emission control components to its ever increasing list of parts. For the thousands of sales reps and commuters on the road who enjoy the style and comfort of the Mercedes C-Class, there’s a new reason to feel secure as a new aftermarket catalytic converter has been included in the list.**

**[See the full parts list here.](#)**

In May 1993, the commuting lives of thousands of sales reps and managers was changed for the better when the Mercedes C-Class was launched to the market. It provided an entry-level option into the prestige world of German automotives with sleek styling that was borrowed from the luxurious S-Class. The popularity of the C-Class has never waned and 30 years later the fifth generation is as popular as ever.

The fourth generation (W205) was launched in 2014 at the North American International Auto Show with bold new styling, four different body types and a new, lighter design that used aluminium and high strength throughout the body. The fourth generation was on the market until 2021, though a mid-life update that included new engines, means that exhaust components changed in 2019.

**Fast Facts About the Mercedes C-Class:**

- The C-Class was named 2015 World Car of the Year (WCOTY) at the New York motor show
- The W205 was the first generation C-Class to offer a plug-in hybrid option
- The fourth generation C-Class has a 5 star Euro NCAP safety rating with a total score of 94%

Klarius estimates that there are more than 44,000 UK drivers who may benefit from the launch of the C-Class catalytic converter should they find they need a replacement. With well over 11,000 applications in the Klarius Products catalogue and next day delivery on orders placed before 5:30pm, Klarius has the vast majority of the UK car parc covered.
