

Klarius caters for the compact and sporty Audi A1 in new parts release

03 September 2024

Klarius continues its strong support for the automotive aftermarket, introducing a list of 10 new emissions control components to its range. Included in this release are new exhausts for the Audi A1 (2014-2018), benefiting those who love its mix of style, comfort and performance.

Having previously been showcased as the 'metroproject' concept car in 2007, and again in 2008 as the 'A1 Project Quattro', the A1 was officially introduced in 2010, shaking up the compact car market. It provided a gateway to the luxurious world of Audi, wrapped in a stylish and compact package. Now, nearly a decade later, the 2018 model continues to deliver on its promise of high-end features in a small form factor, appealing to both city dwellers and young professionals alike.

The second-generation Audi A1, unveiled in 2018, brought with it significant enhancements in design, technology and performance. Built on the Volkswagen MQB platform, it features a sharp, fierce-looking design whilst boasting a larger, more spacious interior despite its compact size. With its bold lines, wide stance, and signature Audi grille, the A1 is as stylish as it is functional, making it a standout in its class.

Fast Facts About the Audi A1

- **All 'teched' out:** The A1 2018 is equipped with Audi's latest MMI touch system, offering seamless connectivity and an intuitive user experience.
- **Safety first:** The A1 features advanced safety systems, including lane departure warning and autonomous emergency braking, earning it a 5-star Euro NCAP rating.
- **Efficiently powerful:** Despite its compact size, the A1 offers a range of turbocharged engines, which strikes a good balance between fuel efficiency and speedy performance.

For city-dwellers and commuting young professionals alike, A1 owners can rest assured that when they need a high-quality, type-approved replacement exhaust, Klarius has their back. Klarius estimates there are over 40,000 A1's on UK roads, and the business is on hand to ensure a replacement exhaust is readily available, offering next day delivery on orders placed before 5:30pm. With over 11,000 emissions control components in its extensive range, Klarius has the vast majority of the UK car parc covered.
