

Klarius' range gets even roomier with parts for the VW Crafter

26 September 2024

Klarius Products is continuing to grow its extensive range of emissions control components, adding 12 new parts this month. Among the latest releases are high quality exhausts for one of the most versatile vans on the road: the Volkswagen Crafter.

[See the full parts list here](#)

The Crafter has long been a favourite for commercial operators and tradespeople, offering a highly desirable combination of flexibility, reliability and space. Since its debut in 2006, the Crafter has become synonymous with durability, making it a go-to choice for those needing a tough and adaptable vehicle.

Fast Facts about the Volkswagen Crafter:

- **A worthy successor:** When the Crafter was launched, it took over the role of Volkswagen's largest light commercial vehicle from the LT. Many people who grew up driving the older vehicle still refer to the Crafter as the LT3!
- **Shapes and sizes:** The Crafter comes in an incredible variety of sizes. Buyers have the option of three wheelbases, four body lengths, and three roof heights!

- **Cranking the volume:** The roomiest Crafter configuration offers an impressive 18.4 cubic meters of load volume. That's big enough to hold 28 human adults [\(1\)](#) – assuming you could persuade them to squeeze together almost perfectly.

Thanks to Klarius' reputation for quality and service, fleet operators and Volkswagen Crafter owners across the country can be confident that their vehicles can be equipped with the finest aftermarket emissions control components available. Parts are designed to meet or exceed original equipment standards, ensuring a Crafter will remain as reliable as the day it was built.

With over 11,000 parts in its catalogue and next-day delivery for orders placed before 5:30 PM, Klarius continues to be the go-to source for quality replacements for light commercial vehicles.
