

Portescap to Exhibit with the Power of One Regal Rexnord at SPS – Smart Production Solutions 2024

09 October 2024

Portescap will be exhibiting at SPS 2024, Europe's premier spotlight on the automation industry. Portescap's range of miniature DC motors are designed with precision in mind, making them the perfect partner for robotics and smart manufacturing. This year the company is joined by sister brands, Stromag and Warner Electric, to showcase a full system approach for the end user.

Portescap and other Regal Rexnord Brands can be found at Booth 122 (Hall 3) at the Nürnberg Messe in Nuremberg, Germany from the 12th to the 14th November, 2024.

Portescap's miniature motion solutions offer an extensive range of BLDC, brush DC, and stepper motors, complemented by motion accessories like gearheads, encoders, and controllers. Recent product highlights include frameless motors, which forego traditional frame and bearings in favor of direct integration into mechanical assemblies; and slotted flat BLDC motors, whose flat architecture is ideal for applications where space is limited and performance demands are high. Working with our team of engineers, customers benefit from maximum motor performance and efficiency, all within the smallest and lightest envelopes.

This year, the Portescap brand will be showcased with Stromag and Warner Electric brands, all part of Regal Rexnord. These sister brands offer electromagnetic brakes, limit switches, and servo motor brakes, which are perfectly suited for demanding automation applications. The show will highlight the capabilities of Regal Rexnord, showcasing support for customers as a single system provider for the most challenging industrial applications.

The Portescap team will be available throughout the show to demonstrate a range of products and to discuss specific customisation questions that visitors might have. To schedule an apportionment prior to the show, please email us at portescap.marcomrequest@regalrexnord.com.

About Portescap

Portescap offers the broadest miniature and specialty motor products in the industry, encompassing coreless brush DC, brushless DC, stepper can stack, gearheads, digital linear actuators, and disc magnet technologies. Portescap products have been serving diverse motion control needs in wide spectrum of medical and industrial applications, lifescience, instrumentation, automation, aerospace and commercial applications, for more than 70 years.
