

Portescap showcases miniature motor capabilities at MD&M West 2025

10 January 2025

Portescap, a leading brand in the design of miniature motor technology, is exhibiting at MD&M West 2025, February 4-6, 2025, at the Anaheim Convention Center, in Anaheim California. At the largest medical design and manufacturing event in North America, Portescap will be exhibiting at booth 1561 to highlight its engineered products and customized motion solutions for the medical device industry.

Portescap will exhibit at the show's MedTech sector, which focuses on providing components and solutions for medical devices. The miniature motion solution designer will present its portfolio, including brushless and brushed DC motors, stepper motors, gearheads, encoders, and controllers. With over 60 years of experience in designing and manufacturing miniature motion systems, Portescap will also showcase its in-house customization capabilities.

Portescap's experience and value-adding reputation is driven by a culture of engineer-to-engineer collaboration with device manufacturers. Portescap's engineers at the show will be available to review OEM and end-user requirements and discuss customizing motion solutions for a diverse range of medical applications, such as medical infusion systems and surgical hand tools.

At MD&M West 2025, Portescap is eager to continue its commitment to the medical device industry through collaboration and high-quality motion solutions that meet the industry's unique needs and regulatory standards. The company will also leverage the wealth of application and engineering expertise available from its partner brands, with a long history of delivering solutions for the medical field. The combined experience of Regal Rexnord covers surgical robotics, laboratory automation, medical imaging, and laboratory diagnostics.

Portescap is a brand of Regal Rexnord and will exhibit alongside fellow Regal Rexnord brands to showcase the combined capabilities of the group. This includes Thomson Industries, present at booth 1563, which provides miniature linear motion components. Meanwhile, Warner Electric, exhibiting at booth 1565, will showcase its range of miniature brakes and clutches. Kollmorgen, the designer of motion solutions for medical equipment, will also be represented at these booths.

About Portescap

Portescap offers the broadest miniature and specialty motor products in the industry, encompassing coreless brush DC, brushless DC, stepper can stack, gearheads, digital linear actuators, and disc magnet technologies. Portescap products have been serving diverse motion control needs in wide spectrum of medical and industrial applications, lifescience, instrumentation, automation, aerospace and commercial applications, for more than 70 years.
