

Regal Rexnord to showcase intralogistics innovations at LogiMAT 2025

06 March 2025

Powering efficient, future-ready material handling with cutting-edge automation, predictive monitoring, and system uptime solutions.

Regal Rexnord will take centre stage at LogiMAT 2025, the leading international trade show for intralogistics solutions and process management, which is being held from March 11–13, 2025 at the Messe Stuttgart convention centre, Germany. It will showcase the comprehensive portfolio of integrated powertrain and automation solutions that allow Regal Rexnord to act as one provider capable of meeting the evolving needs of the material handling industry.

LogiMAT brings together over 1,500 exhibitors and thousands of logistics professionals from more than 80 countries. At this year's show, Regal Rexnord will demonstrate how its broad product offering supports efficient operations across every stage of the intralogistics process—from receiving and warehousing to picking, moving, packing, and shipping.

Powering the future of intralogistics

The intralogistics and material handling industry faces constant pressure to evolve, driven by the need for reliable, and compact, energy-efficient solutions. Regal Rexnord's offering responds to these challenges head-on, combining decades of expertise with cutting-edge technology to help manufacturers minimize downtime, maximize throughput, and stay competitive in a rapidly changing landscape.

Visitors to the Regal Rexnord stand will discover how the company's extensive portfolio of brakes, clutches, chains, conveyors, bearings, gearing, and remote monitoring solutions can streamline operations, reduce maintenance needs, and support the integration of Industry 4.0 technologies. Whether enhancing automation capabilities or improving system uptime, Regal Rexnord's solutions are engineered for performance and reliability.

Game-changing technologies

At LogiMAT 2025, Regal Rexnord will showcase a range of products specifically designed to address the most pressing challenges in modern intralogistics. The Modsort™ modular conveying system and 1533 MatTop® Chain offer dynamic, energy-efficient solutions that optimise product flow and boost system reliability. These conveying technologies are designed to enhance operational efficiency while supporting seamless integration within larger automated systems.

In the area of forklift technology, Regal Rexnord presents innovations that cater to the growing demand for electrification and energy efficiency. This includes PK Brakes from Warner Electric, which offer a perfect combination of safety, reduced energy consumption, performance and versatility, all within a compact footprint. Designed with a proprietary friction material and available in a variety of configurations, the PK Brake offers a solution that can meet any environmental or performance needs.

For applications that demand durability and reliability, Regal Rexnord offers robust industrial components such as leaf chains, engineered for high-load applications, and cam followers, designed to ensure long-term operational consistency. These mechanical solutions are built to withstand the most challenging environments, delivering seamless performance over extended periods.

Meanwhile, the HiflexDRIVE Stainless Steel Geared Motor delivers robust performance for hygiene-critical environments, making it an ideal solution for industries with stringent cleanliness requirements.

Finally, the Perceptiv™ Monitoring Solution offers operators real-time insights into system performance. This powerful tool helps reduce unplanned downtime and enables optimized maintenance strategies, ensuring enhanced equipment functionality and extending the lifespan of critical machinery.

Experience innovation first-hand

Visitors to the Regal Rexnord stand at Hall 1G, Stand 1GA14 can engage with live demonstrations showcasing the power of integrated systems. These interactive displays will highlight how the company's predictive maintenance and automation technologies can drive efficiency and uptime across intralogistics applications.

Expert representatives from Regal Rexnord's key brands—including Warner Electric, Rexnord, Sealmaster, Modsort, Bauer Gear Motor, and McGill—will be available throughout the event to discuss how these solutions can be tailored to meet specific operational needs.

Throughout LogiMAT 2025, attendees will have the opportunity to engage with Regal Rexnord's subject matter experts, who will be available to share insights and discuss the latest innovations in powertrain solutions. The team will have specialists on everything from forklifts to gearing available to provide valuable industry insights and discuss how Regal Rexnord's integrated solutions and ability to act as one provider can help address operational challenges and optimise intralogistics processes.

Join Regal Rexnord at LogiMAT 2025 from March 11–13 at Messe Stuttgart to explore the future of intralogistics.

About Regal Rexnord

Regal Rexnord Corporation is a global leader in the engineering and manufacturing of automation sub-systems, industrial powertrain solutions, automation and power transmission components, electric motors and electronic controls, air moving products, and specialty electrical components and systems, serving customers around the world. Through longstanding technology leadership and an intentional focus on producing more energy-efficient products and systems, Regal Rexnord helps create a better tomorrow – for its customers and for the planet.

Following the acquisition of Altra, and commencing with its 1Q 2023 earnings release, Regal Rexnord will report under four operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, Automation & Motion Control and Industrial Systems. Regal Rexnord is headquartered in Beloit, Wisconsin and has manufacturing, sales, and service facilities worldwide.
