

## **Klarius Strengthens Parts Support for the Fiat**

### **Ducato and More**

**30 April 2025**

**Klarius Products continues to support the aftermarket automotive sector with the introduction of 23 new emission control components for a selection of popular cars and vans. This release provides coverage for over 680,000 vehicles in the UK and over 2.9 million across Europe.**

Included in this release are new emissions control components for brands such as Chevrolet, Citroën, Fiat, Ford, Lexus, Mercedes, Mini, Peugeot, Renault and more. Any owners of a Fiat Ducato, one of Europe's favourite vans, will be pleased to hear that two new exhaust components have been launched for the 2015 (onwards) models, covering over 408,000 across Europe.

[See the full parts list here.](#)

Ever since the first Fiat Ducato rolled off the assembly lines in 1981, the brand has been a popular choice for campervan conversions, as well as operators looking for lightweight commercial vehicles. 41 years, four generations and many facelifts later, you're still just as likely to see a Ducato parked aside popular bike trails as you are to see it outside your local builders merchants.

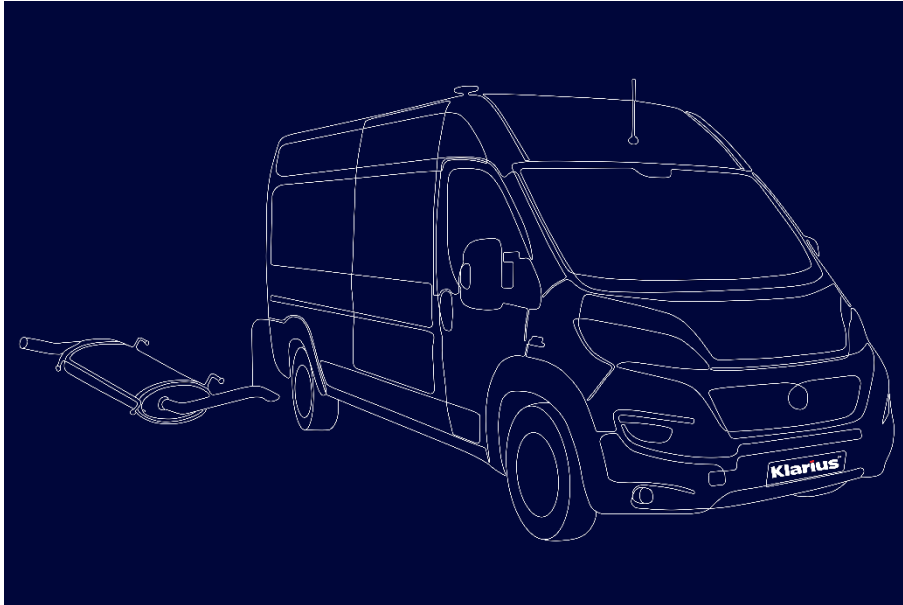

No matter what the Ducato is being used for, we know that their owners rely on them to get the job done. Which is why Klarius has launched exclusive aftermarket exhaust parts that match or exceed the original equipment standards.

### **Fast Facts About the Fiat Ducato**

- The Ducato's name derives from the Ducat; a coin from the Middle Ages that was used throughout Europe
- It has been voted "Best Motorhome Base Vehicle" sixteen years in a row (2009 – 2024)
- It is the 10th most popular selling van of all time (over 3.5 million sold)

The introduction of the latest emissions components to the Klarius product portfolio means that Ducato owners across the UK, and throughout Europe, can continue to enjoy the freedom of the road with total peace of mind. There are over 11,000 parts in the Klarius Products catalogue and next-day delivery on orders placed before 5:30pm, helping to keep UK drivers on the road.
