

Regal Rexnord Aerospace Solutions to showcase integrated innovation at Paris Air Show 2025

Regal Rexnord is set to exhibit at the Paris Air Show 2025, one of the world's most prestigious aerospace exhibitions, taking place from 16-22 June in Le Bourget, Paris, France. At the event, the company will present its advanced aerospace capabilities under the Regal Rexnord Aerospace Solutions banner, highlighting a comprehensive range of integrated technologies designed to meet the evolving needs of both commercial and defense aviation.

Located at Hall 3, Stand D-42, the Regal Rexnord booth will demonstrate how the company's comprehensive portfolio supports performance, reliability, and supply chain simplification across the aerospace industry. The technologies and solutions on show draw from the combined expertise of trusted brands including **Rexnord Aerospace™, Kollmorgen™, Portescap™, Nook™, Thomson™, Delavan™, and Formsprag Clutch™**.

One name. One partner. Many capabilities.

Visitors to the stand will experience the full power of Regal Rexnord's highly integrated approach. With decades of aerospace heritage across multiple specialist brands, the company is a single-source partner able to offer both standalone components and full vertically integrated systems.

This unique model allows OEMs and Tier 1 suppliers to simplify their supplier networks, streamline agreements and NDAs, and build more resilient supply chains - all while accessing a broad, high-performance portfolio from a single trusted provider.

“As customers seek to develop new technologies, they’re looking for partners who can do more,” said Julian Del Campo, Sr. Business Development Manager. “By bringing together specialist capabilities from across the Regal Rexnord family, we offer an extensive aerospace solutions portfolio under one roof.”

Spotlight on actuation for advanced air mobility

A key focus at this year’s show will be Regal Rexnord’s advanced actuation capabilities, featured prominently in a dedicated Advanced Air Mobility (AAM) corner of the booth.

Here, attendees will find a working actuator demo, supported by a detailed system map showing where Regal Rexnord technologies are deployed across a modern aircraft. Visitors will see how Regal Rexnord’s integrated product ecosystem supports the rapidly evolving AAM sector, where demands for compact, reliable, and efficient systems are higher than ever.

Beyond AAM, the Regal Rexnord team will also be demonstrating the company's offerings around aerospace applications, including:

- Engines and APUs
- Transmission systems
- Flight control and airframe
- Open systems
- Weapons systems

"The company’s experts will be on hand to show how individual technologies - from clutches to bearings and gearing - combine to deliver performance, reliability, and innovation."

Reducing complexity and enhancing support

In an industry where reliability, traceability, and responsiveness are critical, the ability to work with a single supplier offering a full range of integrated technologies is a significant advantage. By uniting such a wide range of solutions under one supplier, Regal Rexnord allows customers to simplify procurement, strengthen supplier relationships, and improve program agility.

Working with Regal Rexnord offers a partnership built on trust, integration, and a long-term vision for aerospace innovation. With a unique combination of heritage, engineering expertise, and collaborative engagement, Regal Rexnord supports the evolving priorities of OEMs and Tier 1s alike, helping futureproof operations in a rapidly changing global landscape.

If you'd like to learn more, make sure to visit Regal Rexnord at Hall 3, Stand D-42.

About Regal Rexnord

Regal Rexnord's 30,000 associates around the world help create a better tomorrow by providing sustainable solutions that power, transmit and control motion. The Company's electric motors and air moving subsystems provide the power to create motion. A portfolio of highly engineered power transmission components and subsystems efficiently transmits motion to power industrial applications. The Company's automation offering, comprised of controllers, drives, precision motors, and actuators, controls motion in applications ranging from factory automation to precision tools used in surgical applications.

The Company's end markets benefit from meaningful secular demand tailwinds, and include discrete automation, food & beverage, aerospace, medical, data center, energy, residential and commercial buildings, general industrial, and metals and mining.

Regal Rexnord is comprised of three operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, and Automation & Motion Control. Regal Rexnord is headquartered in Milwaukee, Wisconsin and has manufacturing, sales and service facilities worldwide.
