

Regal Rexnord highlights complete powertrain solutions for port cranes at TOC Europe 2025

05 June 2025

Regal Rexnord is returning to TOC Europe 2025, one of the top gatherings for international port and crane professionals, from 17-19 June at the Rotterdam Ahoy Centre, Netherlands. At the show, the company will showcase a complete range of high-performance technologies designed to power, control, and protect port crane systems.

Visitors will find Regal Rexnord in Hall 1, Stand G22. There, the company will highlight how its trusted brands, including **Svendborg Brakes™**, **Jaure™**, **Stromag™**, **Stearns™**, and **Bauer Gear Motor™**, can offer a uniquely broad portfolio of motion control, braking, and drive technologies for port equipment OEMs and operators.

With proven solutions, global service capabilities, and a focus on interoperability, Regal Rexnord can act as a single supplier across countless applications. This helps the port sector streamline maintenance, reduce downtime, and build more efficient, resilient systems.

Trusted brands, unified solutions.

Visitors to Regal Rexnord's stand will be able to explore a curated selection of braking and powertrain components tailored to the demands of ship-to-shore, gantry, and mobile container cranes. Some of the featured products include:

- Emergency and service brakes
- Retractable rail clamp
- Barrel coupling
- Motor brakes
- Limit switches
- Friction materials

These technologies are designed to deliver high performance under extreme conditions, with corrosion protection, modular construction, and easy maintenance access as standard. All are backed by the engineering heritage of brands already proven in the industry as well as adjacent challenging sectors such as mining, steel, and wind energy.

“Customers are looking for manufacturers who can deliver package solutions,” says Cedric Gomez, Business Development Director at Regal Rexnord. “At TOC, we’re showing that we don’t just offer individual products – we provide a unified package of brakes, couplings, gearing, and support, all designed to work together from day one.”

This integrated approach helps crane OEMs and port operators simplify procurement, reduce supply chain complexity, and ensure seamless system performance. And thanks to the company’s global service footprint, built on the foundations of the Svendborg Brakes network, technical support and spare parts are never far away.

Performance-driven solutions

At TOC, visitors will be able to speak directly with Regal Rexnord’s technical experts and explore how these solutions help improve system safety, reduce total cost of ownership, and extend equipment life.

From thruster disc brakes and modular motor brakes to high-torque couplings and storm brakes, Regal Rexnord provides everything needed to support crane performance across the full lifecycle, from initial specification to long-term operation.

Whether you're an OEM seeking full system solutions or an operator aiming to improve performance and uptime, Regal Rexnord is ready to support your goals.

Visit Hall 1, Stand G22 at TOC Europe 2025 to discover how Regal Rexnord is helping ports move forward – more safely, reliably, and efficiently.

About Regal Rexnord

"Regal Rexnord's 30,000 associates around the world help create a better tomorrow by providing sustainable solutions that power, transmit and control motion. The Company's electric motors and air moving subsystems provide the power to create motion. A portfolio of highly engineered power transmission components and subsystems efficiently transmits motion to power industrial applications. The Company's automation offering, comprised of controllers, drives, precision motors, and actuators, controls motion in applications ranging from factory automation to precision tools used in surgical applications.

The Company's end markets benefit from meaningful secular demand tailwinds, and include discrete automation, food & beverage, aerospace, medical, data center, energy, residential and commercial buildings, general industrial, and metals and mining.

Regal Rexnord is comprised of three operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, and Automation & Motion Control. Regal Rexnord is headquartered in Milwaukee, Wisconsin and has manufacturing, sales and service facilities worldwide. For more information, including a copy of our Sustainability Report, visit [RegalRexnord.com](https://www.RegalRexnord.com)."
