

## **Klarius add new parts support for over 300k UK vehicles**

**29 July 2025**

**Klarius Products has launched 11 new emission control components for some of the UK and Europe's most popular family cars. The commitment Klarius shows to new product R&D means that every month hundreds of thousands of vehicles are given the reassurance of high-quality aftermarket emission support. This month's releases support 303,000 vehicles in the UK and a further 1.4 million across Europe.**

This release supports family favourite brands including Dacia, Fiat, Jeep, Kia, Peugeot, Škoda, Toyota and Volkswagen. Any owners of the first generation of Kia's ever popular compact SUV, the Niro, will be pleased to know that Klarius has launched emissions control components that perform equally as well as the OEM parts.

[See the full parts list here.](#)

On the market between 2016 and 2022, there are still more than 50,000 gen1 Niro's on the road in the UK and almost 200,000 in Europe. This longevity is hardly surprising given Kia's reputation for quality and reliability, but, as many of these vehicles begin to fall outside of the impressive 7-year warranty, owners will be pleased to be supported by the aftermarket.

### **Fast Facts About the Kia Niro**

- Received a Guinness World Record for the 'lowest fuel consumption by a hybrid vehicle' in 2016
- Named 'small SUV of the year' at the 2022 Auto Express New Car Awards
- It was the first Kia to model to feature both Android Auto and Apple Car Play
- The name was created as an amalgam of the phrase "near zero" in reference to its low emissions

The introduction of the latest emissions control components to the Klarius product portfolio means that Niro owning families can set off on their summer holidays this year with total peace of mind. There are over 11,000 parts in the Klarius Product catalogue and next-day delivery on orders placed before 5:30pm, helping to keep UK drivers on the road.
