

Regal Rexnord to display comprehensive motion control solutions at Automation Expo India 2025

15 July 2025

Regal Rexnord will showcase the combined strength of its Kollmorgen™, Thomson™, and Portescap™ motion control technology portfolio at Automation Expo India 2025, taking place from 11-14 August at the Bombay Exhibition Centre, Mumbai.

Visitors to Hall 6, Stand R-05 will discover how Regal Rexnord's motion control solutions can address the full spectrum of motion control challenges facing manufacturers. Live demonstrations and expert insights will highlight how Regal Rexnord is helping OEMs and system integrators accelerate innovation across robotics, factory automation, medical, and mobile machinery applications.

One partner. Infinite motion control solutions.

As demand grows in India for smarter, more scalable automation, Regal Rexnord demonstrates its commitment to delivering unified motion solutions that simplify complexity and reduce time to market.

Together, Kollmorgen, Thomson and Portescap offer a broad portfolio of technology portfolio, deep application knowledge and a proven process for collaborative design, and global manufacturing and support. Leveraging these collective capabilities, Regal Rexnord enables machine builders to differentiate their automation solutions, streamline their supply chains, and accelerate their time to market.

“This is more than a showcase of individual products. It’s about demonstrating how our motion control experts collaborate to deliver integrated systems and co-engineered solutions that truly support our customers,” says Vinod Sharma, Sales Director at Kollmorgen India.

Technologies tailored for India's automation future

Each of the three Regal Rexnord brands exhibiting at the show brings its own distinct capabilities that address specific market needs. These can be combined to deliver a comprehensive motion control solution or implemented individually to cater for a customer’s specific needs.

Kollmorgen will present its latest generation of servo motors and drives, featuring real-time responsiveness, multi-axis coordination and high-performance, precision control. The team will be providing visitors with a live demonstration showcasing the precision and reliability needed to operate safely and efficiently in high-throughput manufacturing applications.

Thomson will highlight its comprehensive linear motion portfolio, with special focus on the Electrak® XD heavy-duty actuator. It is the only all-electric solution with on-board electronics on the market today that features up to 25 kN dynamic load, taking the next step in replacing hydraulics while still providing excellent energy efficiency and precision. The booth will also feature a range of linear bearings, guides, ball screws, and round rail assemblies suited for factory automation, packaging, and robotics applications.

Portescap will present its precision miniature motor technologies, including brushless DC, brush DC, and stepper motor solutions, that are ideally suited for advanced industrial automation.

Tailored for India's next-gen manufacturing

India's automation sector is undergoing a significant transformation, driven by increasing digitalization, growing emphasis on localization, and the Indian government's 'Make in India' initiative. Regal Rexnord's integrated portfolio is well-positioned to support this evolution, offering energy-efficient technologies, modular solutions, and robust local service capabilities.

This showcase comes at a pivotal moment as India accelerates its efforts toward achieving net-zero emissions by 2070. Regal Rexnord shares this commitment to sustainability, with established programs for reducing its own carbon footprint, while supporting its customers' efforts with sustainable product designs.

Expert collaboration and co-engineering

Throughout the event, technical specialists from all three Regal Rexnord brands will be available for in-depth consultations. Whether discussing standard solutions or highly specific customization needs, visitors can explore how Regal Rexnord's co-engineering approach accelerates innovation while reducing supply chain complexity.

As a global manufacturer of motion control, industrial powertrain, and power transmission solutions, Regal Rexnord has over 30,000 associates and 200 locations worldwide. For more than 125 years, the company's portfolio of technology brands has grown intentionally and thoughtfully.

Pairing these technologies with deep motion expertise across a broad range of industrial applications, including factory automation, Regal Rexnord engineers

serve as trusted advisors to customers, delivering custom-tailed solutions meeting the most complex design and production requirements.

"Indian manufacturers are looking for partners who can do more – a company, such as Regal Rexnord, that can provide not just individual products but complete custom-engineered and fully-integrated solutions, and that offer the global scale and scope in design, manufacturing, and support required for long-term reliability and success," says Sharma. "That's exactly what visitors will experience at the Regal Rexnord stand."

Visit Hall 6, Stand R-05 at Automation Expo India 2025 to discover how Regal Rexnord is helping Indian manufacturers build smarter, more efficient, and more sustainable automation systems.

About Regal Rexnord

Regal Rexnord's 30,000 associates around the world help create a better tomorrow by providing sustainable solutions that power, transmit and control motion. The Company's electric motors and air moving subsystems provide the power to create motion. A portfolio of highly engineered power transmission components and subsystems efficiently transmits motion to power industrial applications. The Company's automation offering, comprised of controllers, drives, precision motors, and actuators, controls motion in applications ranging from factory automation to precision tools used in surgical applications.

The Company's end markets benefit from meaningful secular demand tailwinds, and include discrete automation, food & beverage, aerospace, medical, data center, energy, residential and commercial buildings, general industrial, and metals and mining.

Regal Rexnord is comprised of three operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, and Automation & Motion Control. Regal Rexnord is headquartered in Milwaukee, Wisconsin and has manufacturing, sales and service facilities worldwide.
