

Regal Rexnord showcases complete beverage line solutions at drinktec 2025

5 August 2025

Regal Rexnord™ will be exhibiting at drinktec 2025, the leading global trade fair for the beverage and liquid food industry, between 15–19 September at Messe München, Germany. At Hall C1, Stand 301, visitors will discover how Regal Rexnord delivers end-to-end value for beverage producers, with integrated solutions, predictive services, and trusted technologies that boost productivity, reduce costs, and drive sustainable performance.

Representing a broad portfolio of brands – including **Rexnord™, System Plast™, ModSort™, Sealmaster™, McGill™, Huco™, Warner Electric™, and Stieber™** – the company will highlight its ability to optimize every aspect of a beverage production line, from conveying and powertrain solutions to uptime support and maintenance planning.

Trusted expertise for beverage industry performance

Regal Rexnord is a highly trusted partner to beverage producers worldwide, helping resolve key production challenges, from excess water and lubrication use to minimizing product damage and unplanned downtime. Backed by over 90 years of beverage production expertise, the company delivers industry-leading solutions to power, transmit and control motion. This includes a huge range of products including chains, bearings, motors, gearboxes, clutches, and remote monitoring technologies.

Whether handling bottles, cans, or specialty containers, Regal Rexnord supports line optimization at every stage, enhancing productivity, reducing maintenance, and ensuring low total cost of ownership. With a focus on sustainability and compliance, its integrated solutions help manufacturers meet rigorous standards while achieving measurable efficiency gains and long-term competitiveness.

Maximized uptime with Regal Rexnord Premium Services

One of the key offerings featured at the drinktec booth will be Regal Rexnord Premium Services – a specialized survey of your conveyor line designed to maximize uptime and reduce maintenance costs. This includes asset identification, a condition evaluation with a health report, and optional periodic inspections.

This data-driven approach helps plant teams make proactive maintenance decisions, avoid unplanned downtime, and reduce replacement costs by identifying the ideal component replacement window – not too early, not too late. This gives beverage manufacturers the insights and confidence to run leaner, more resilient operations.

The Rexnord™ 1100 Series FlushTop™ MatTop™ Chain

One of the key products on display at drinktec will be the **Rexnord™ 1100 Series FlushTop™ MatTop™ Chain**, purpose-built to meet the demands of modern production lines. Designed to run dry – without the need for external lubrication – the 1100 Series helps producers reduce water and chemical usage while enhancing safety and cleanliness on the plant floor. Its flat, flush surface ensures smooth, stable transport across a wide range of container types, minimizing product tipping and line jams.

With an open-hinge design for easier cleaning and improved hygiene, the 1100 Series is ideal for high-speed bottling, canning, and packaging environments where fast changeovers and sanitary design are essential. Engineered for low-friction performance, the chain supports greater energy efficiency and extended component life, contributing to both operational savings and sustainability goals.

Global strength, local support

As a US\$6B global manufacturer with over 30,000 associates and 200+ locations worldwide, Regal Rexnord offers beverage OEMs and plant operators industry leading scale, stability, and responsiveness. Customers gain streamlined access to a world-class engineering network and a product and service portfolio that covers everything from powering to transmitting and controlling motion.

With all engineering handled by Regal Rexnord, powertrain solutions are fully optimized to your application, helping simplify procurement, reduce inventory, and deliver greater performance from day one.

Visit Hall C1, Stand 301 at drinktec 2025 to discover how Regal Rexnord can help you achieve more with less waste, lower cost, and smarter service.

About Regal Rexnord

Regal Rexnord's 30,000 associates around the world help create a better tomorrow by providing sustainable solutions that power, transmit and control motion. The Company's electric motors and air moving subsystems provide the power to create motion. A portfolio of highly engineered power transmission components and subsystems efficiently transmits motion to power industrial applications. The Company's automation offering, comprised of controllers, drives, precision motors, and actuators, controls motion in applications ranging from factory automation to precision tools used in surgical applications.

The Company's end markets benefit from meaningful secular demand tailwinds, and include discrete automation, food & beverage, aerospace, medical, data center, energy, residential and commercial buildings, general industrial, and metals and mining.

Regal Rexnord is comprised of three operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, and Automation & Motion Control. Regal Rexnord is headquartered in Milwaukee, Wisconsin and has manufacturing, sales and service facilities worldwide.
