

## **The 208 is one of a million with Klarius new parts release**

**27 August 2025**

**21 new emission control components have been released by Klarius Products, which combined will supported an estimated 1.1 million cars on the road in the UK (and a further 3.4 million in the EU). As always, Klarius has released parts for many of the nations most popular car and van manufacturers, bringing OEM quality to the aftermarket.**

The new release for August includes family saloons, SUV's, hatchbacks, coupes, vans and more, from brands such as Ford, Hyundai, Kia, Nissan, Peugeot, Renault, Seat, Škoda, Vauxhall and Volkswagen. Included in the list is an exhaust for the 2020 Peugeot 208 second edition hatchback, which was first unveiled at the Geneva Motor Show in March 2019 and has been regular high-performer in its category class ever since.

[See the full parts list here.](#)

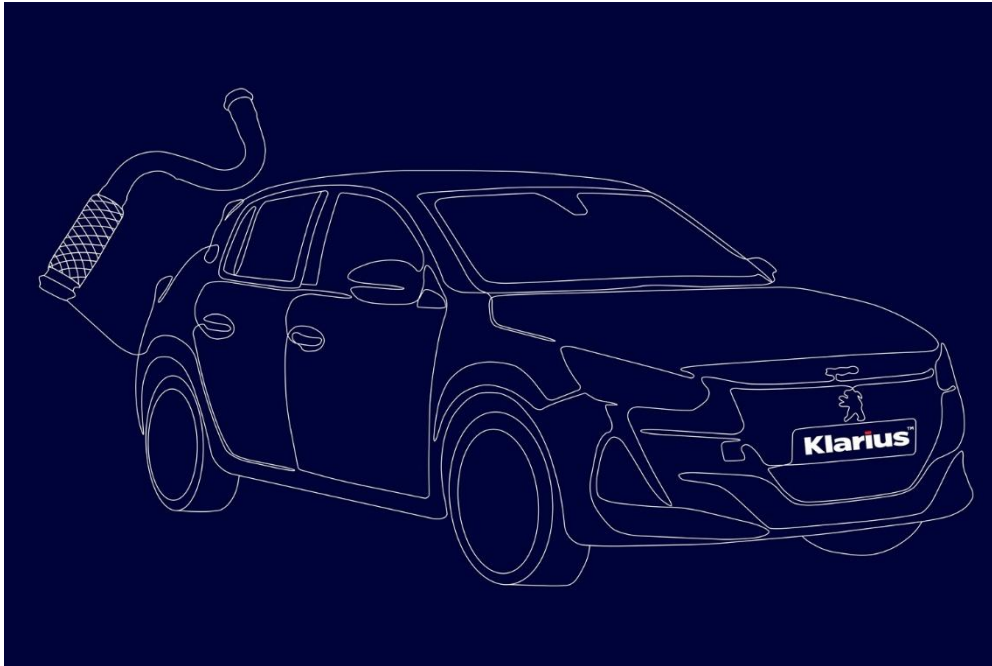

The second generation of the Peugeot 208 was launched as a slimmed down version of its earlier self, with design enhancements that made significant improvements to comfort including reduced noise, vibration and harshness in the cabin and the popular 'i-Cockpit' layout, including digital instrument cluster and touchscreen display. Still being sold today, there are an estimated 170,000 208s on the UK roads and well over half a million in Europe.

### **Fast Facts About the Peugeot 208**

- The 208 will always be associated with Sébastien Loeb's record-breaking Pikes Peak run
- Won the European Car of the Year (2020) in its first year on the market
- The 208's lineage dates back to the 205 – released in 1983
- Europe's best-selling car in 2022

The introduction of the latest emissions components to the Klarius product portfolio means that 208 owners can enjoy the journey and not worry about bumps along the way, though we do recommend taking a little more care than Sébastien Loeb. There are over 11,000 parts in the Klarius Product Catalogue and next-day delivery on orders placed before 5:30pm, helping to keep UK drivers on the road.
