

Regal Rexnord to showcase scalable power transmission solutions at Agritechnica 2025

30 October 2025

Regal Rexnord will present its latest innovations for the agricultural machinery sector at Agritechnica 2025, taking place from 9–15 November in Hanover, Germany. Visitors can meet the team at Hall 16, Booth E30, where the company will demonstrate how its portfolio of trusted brands delivers reliable, efficient, and future-ready motion solutions for a rapidly evolving industry.

Several of Regal Rexnord's leading agriculture brands will be showcased on the stand, including **Rex™, Rollway™, Sealmaster™, McGill™, Stromag™, Warner Electric™, Stieber™, Rexnord™, CENTA™, Thomson™, Durst™, and Browning™**. Together, they highlight a portfolio of technologies designed to help OEMs and farmers alike improve efficiency and keep vital equipment running strong, season after season.

Delivering reliable performance across every application

Visitors to the Regal Rexnord booth will be able to explore a wide selection of components designed to power, transmit, and control motion in agricultural machinery. Among the highlights will be Warner Electric's Cross Auger PTO Clutch and bale wrap clutch/brake, Stromag's KMK Multi-Disc Clutch, and a range of Thomson Electrak™ electric linear actuators, including the XD, HD, MD, and Max Jac series.

CENTAFLEX torsional couplings will also be featured, alongside Rollway and McGill bearing solutions and Rex roller chain.

Whether it's designing larger, more powerful machines for heavy-duty applications or compact systems for specialist or autonomous equipment, Regal Rexnord provides scalable solutions that adapt to changing machine requirements. Its broad component range ensures optimal performance across every size category – helping OEMs deliver equipment that's not only efficient but also right-sized for its intended task.

Together, these technologies embody Regal Rexnord's commitment to keeping agricultural machinery running strong, season after season – whether in harvesters, tractors, balers, sprayers, planters, seeders, spreaders, or irrigation systems. Each solution is built to withstand the harsh operating conditions faced by farm equipment while improving uptime and overall machine performance.

Supporting innovation and sustainability in modern agriculture

Visitors to the booth can expect an interactive experience as well as opportunities to speak with industry experts. The team will also host product demonstrations showing how Regal Rexnord's technologies are supporting the next generation of efficient, sustainable farm machinery.

One of the major shifts across the agricultural industry has been the move to embrace hybrid and electric powertrains. Regal Rexnord is supporting this evolution by helping OEMs adapt through advanced power transmission and motion control technologies.

Trusted partners for the future of farming

“At Agritechnica 2025, we’re showing how Regal Rexnord’s solutions help customers maximize equipment availability, optimize performance, and prepare for the next phase of agricultural innovation,” said Peter Mills, Global Industry Sales Director at Regal Rexnord. “Our comprehensive portfolio allows machine builders to design with confidence, combining proven reliability with the flexibility needed for hybrid and electric systems.”

Regal Rexnord invites attendees to visit **Hall 16, Booth E30**, to discover how its power transmission and motion control solutions are helping to build a more efficient, sustainable, and productive future for global agriculture.

About Regal Rexnord

Regal Rexnord Corporation is a global leader in the engineering and manufacturing of automation sub-systems, industrial powertrain solutions, automation and power transmission components, electric motors and electronic controls, air moving products, and specialty electrical components and systems, serving customers around the world. Through longstanding technology leadership and an intentional focus on producing more energy-efficient products and systems, Regal Rexnord helps create a better tomorrow – for its customers and for the planet.

Following the acquisition of Altra, and commencing with its 1Q 2023 earnings release, Regal Rexnord will report under four operating segments: Industrial Powertrain Solutions, Power Efficiency Solutions, Automation & Motion Control and Industrial Systems. Regal Rexnord is headquartered in Beloit, Wisconsin and has manufacturing, sales, and service facilities worldwide.
