

Portescap Achieves AS9100 Certification Across All Global Manufacturing Facilities

18 November 2025

Portescap, a leading provider of precision motion solutions, has reached a major milestone in its aerospace journey: all three of its manufacturing facilities – West Chester, Pennsylvania; Mahape, India; and Mumbai, India – are now AS9100 certified. This achievement underscores the company’s alignment with the aerospace industry’s highest standards for quality and safety.

“Achieving AS9100 certification across all our global manufacturing sites is a powerful validation of the discipline, innovation, and customer focus that define our team,” said Adrien Mettraux, Aerospace and Defense Industry Manager. “It’s not only about meeting standards; it’s about exceeding expectations and ensuring our motion solutions perform flawlessly in the most demanding aerospace environments.”

The accomplishment also contributes to a broader success within Regal Rexnord Aerospace Solutions, which now boasts 14 AS9100-certified facilities worldwide. This expanding global footprint reflects Regal Rexnord’s commitment to delivering high-performance solutions that meet the complex demands of aerospace customers across continents.

Precision motors and accessories produced by the company play a vital role in a wide range of commercial aerospace and defense applications. By adhering to AS9100-compliant processes, Portescap’s solutions are built to deliver consistent performance and reliability in challenging environments.

As aerospace systems continue to evolve, Portescap remains focused on innovation, quality, and global collaboration – driving motion where precision matters most. Learn more about how Portescap is powering next-generation motion solutions in aerospace here: www.portescap.com.

About Portescap

Portescap, a proud member of Regal Rexnord, excels in addressing critical motion challenges with premium miniature electronic motors and components. For over 70 years, our extensive product range – including coreless brush DC, brushless DC, stepper, gearhead, encoder, and controller technologies – has powered applications across the aerospace and defense, automation, industrial power tools, medical, robotics, and surgical hand tool industries. Expert engineers collaborate with you from prototype to production, ensuring exceptional performance tailored to your specific needs.

As part of Regal Rexnord, customers benefit from seamless access to a vast brand portfolio and a robust global manufacturing and sourcing network. Dedication to innovation and sustainability drives us to design products that significantly impact daily life. Leveraging Regal Rexnord's broader expertise and resources, we aim to deliver sustainable solutions that power, transmit, and control motion, helping to create a better tomorrow.
