

Klarius adds new parts for Peugeot 208 to its line-up

20 November 2025

Klarius Products has released 27 new emissions control components, adding coverage for more than 650,000 vehicles in the UK and over 2.3 million across Europe. This month's update includes parts for Alfa Romeo, Citroën, Fiat, Ford, Hyundai, Kia, Suzuki, Volvo and Volkswagen.

Among the biggest additions is a new exhaust component for the Peugeot 208 II 1.2 (2019>). This part covers a total of 49,588 vehicles across the EU, offering garages a dependable, direct-fit option for one of Peugeot's most popular small cars.

The second-generation Peugeot 208 built on the success of its predecessor by offering sharp looks, strong fuel economy and a simple driving experience. With the 1.2-litre petrol engine found across much of the range, it remains a common sight on UK roads.

Klarius' new exhaust addition helps garages keep these cars running as they should.

Fast Facts About the Peugeot 208:

- **Award Winner:** The second-generation 208 was named European Car of the Year in 2020.

- **Hill Climb Heroics:** In 2013 Sébastien Loeb used a modified Peugeot 208 to smash the record on the famous Pikes Peak Hill Climb.
- **A Big Seller:** The 208 was the best-selling car in Europe in 2022, with more than 200,000 new registrations

With more than 11,000 items in the catalogue, Klarius continues to supply high-quality emissions parts for both new and older vehicles. All components come with a two-year warranty, are manufactured to meet or exceed OE standards, and backed by a Fit First Time guarantee. On top of this, they are available for next-day delivery across the UK when ordered before 5:30pm.
